

Osprey Complimentive Hydration and Nutrition Project

This program is now in its 3rd year and is delivered from our West home office during operational hours, including our OAT clinics on Friday.

The program is simple in nature so that we provide enough healthful food and drink to ensure that a person has enough protein and other food to last a day. Folks just have to ask.

This year, REDUN, the B.C.F.N.H.A. and our sister office ANKORS East have all contributed to support the program in our outreach service throughout the West.

We are always looking for support to keep the program going and to date have served approximately 2700 packs.
